

## WAR CALL MAY INCLUDE WOMEN

**Milady Will Mount Plow When Husband Shoulders Musket.**

By United Press  
WASHINGTON, April 6.—Can we enlist a million American women to do men's work this summer on the farm?

I ask this question because it is possible that this summer the United States may be in as great need of farm laborers as of soldiers and munition makers. But whether the actual opportunity comes this year or not, preparedness of the individual for war or for peace demands that American farm women be ready for every possible emergency.

It is well within the bounds of probability that the available farm labor of the United States will be materially reduced by the calling of many men to other and more hazardous duties than sowing and reaping.

It is physically possible for the farm women of America to aid our present economic preparedness in the event that a war summons an immense army to the colors. To handle modern farm implements is not necessarily beyond a woman's strength. With a good team and a riding cultivator equipped with a sun umbrella plowing corn is a deal more pleasant than washing. The spring seat of a binder compares favorably with the comfort of a piano stool. Few household duties are more fun than riding a hay-rake. Even plowing with a sulky plow is not too heavy a strain for some American women.

Every farm girl and woman should proceed at once to master the elements of practical scientific farming. Those who can should attend short courses in agricultural schools and every one should ask questions, observe and read bulletins.

The Department of Agriculture has issued a concise, simple, practical primer of scientific agriculture for the Middle West—Farmers' Bulletin No. 704—which can be obtained through Congressmen or directly from the Department of Agriculture. Similar bulletins for other regions are now under preparation.

Every farm girl and woman, moreover, should, by all means, take a hand in actual farm operations so as to handle tractors, horses and farm implements readily and skillfully. Those who do so will not have to prepare after the fighting has begun, to do their "bit" for their country in time of danger. They will know how to plant, cultivate and harvest the crops essential to our nation's welfare when saving them depends upon the service of the women in the field.

Let the million women step forward.

## AND DEWEY INVENTED AVIATORS

**Philadelphia Students Give Startling Answers to Current Questions.**

By United Press  
PHILADELPHIA, April 6.—In a general information test held in Friends Select School here, it is learned that: 'Ben Lindsey, a famous juvenile court judge, is "a mountain in Scotland." Not a single pupil described Jeannette Rankin as the first Congresswoman, although she was considered "the richest woman in the world." A filibuster is new gun used in war. Herbert O. Hoover is a member of the firm of Hoover & Smith, of this city. "William F. Cody was the inventor of the code system."

"Admiral Dewey, a great German man, who invented aviators, is among the famous men who have died within the past year." "Easter is set by the President of the United States." "Benjamin Franklin is famous for inventing lightning." "Easter is determined by leap year." "Intern means to keep inside" and "when your turn comes." "A censor is a man who takes the census" and "a party of men in Washington who open letters." "The Reichstag is a German holiday."

"The Duma—a leader in India—a French novelist—one dumb or stupid."

## WANTS HOME "PREPAREDNESS"

**Carl Vrooman Says Balanced Meals Will Prevent Sickness.**

By United Press  
WASHINGTON, April 6.—The domestic life of a modern army should be an example to every American housewife. In the army the ration is well balanced, the cheapest, nutritious and palatable foods are purchased, and the most economical means of preparing them are used.

It is a patriotic duty at all times, whether there is war or peace, for every American woman, rich or poor, to keep her home "prepared." Home preparedness means substitution of cheap, appetizing dishes for costly foods, practical elimination of waste, and scientifically balanced rations.

There are two great groups of foods that enter a balanced human ration—the protein group, like meat, eggs, and beans, and the starch group, such as potatoes, rice, cereals, bread,

etc. The protein foods as a rule are more expensive than the starchy foods. Some protein foods, however, are cheap. The prime factor in economy in foods is the choice of protein foods that are at the same time cheap and palatable.

A cheap food, rich in protein and fats, is the ordinary field soy bean, often sold under the name "Togo Bean." Ten cents worth at the price of 15 cents a quart will supply over 5 ounces of protein, while average beef at 20 cents a pound will supply little over 1 ounce of protein for the same money.

Excellent soups can be made from the water in which the soy beans are cooked, as well as from the water in which most vegetables are boiled. Save also vegetable tops, skim milk, bones and meat scraps for soups. Make the butcher give you all the fat that he weighs with your cut of meat—it's valuable grease.

Don't depend on one kind of food. When potatoes are dear remember that 1 pound of dry corn meal provides about 5 times as much fuel or energy and 5 times as much tissue-building protein as 1 pound of raw potatoes and cost from one-third to one-sixth as much.

Raisins are rich in sugar, mineral salts, and the natural grape acids and their cost is low.

Whole wheat, cooked until it bursts open, or cracked in a little \$2.50 hand mill is one of the most delicious and nourishing breakfast foods known—and inexpensive even at the present high price of wheat.

Save fuel and labor by making hot breads only when using your fire for the cooking of other foods. Avoid the danger of overcooking, and conserve the flavor of the your dinner by using a fire less cooker. You can make good one yourself very cheaply.

By such expedients as these every woman can "prepare" her home not only against war but also against sickness and hard times.

HOME FOR RENT: Will rent for two or three months, beginning about June 10, a seven-room house, completely furnished and entirely modern; a few blocks from Agricultural campus. Phone 1012 Green. R-193

## SOCIETY NOTES

Miss Gladys Roberts entertained at dinner last night at her home on Bass avenue the following members of the Phi Mu sorority who are here during the holidays: Misses Minnie Hillix, Arte Wyatt, May McDonald and Geneva Davis.

Ralph Dodson will give a dinner party tonight at the Mission Hills in Kansas City for the members of the Sigma Chi fraternity of the University who are spending the holidays in Kansas City. After the dinner, the members will attend the concert to be given by the Missouri Glee Club. H. L. Thompson of Temple, Tex., a member of the fraternity is the house guest of Mr. Dodson during the holidays.

A "He-club" has been formed by the University men for protection against loneliness during the holidays. Last night the members gave a dance at the Sigma Chi house. Tonight they will have a party at the Delta Tau Delta house, and tomorrow night they plan a dance at the Sigma Alpha Epsilon house.

Doctor and Mrs. James A. Gibson will chaperone a dance to be given by the members of the Alpha Chi Sigma fraternity who remained here for the holidays.

Plans for raising money for the Old Ladies' Home at Mexico were discussed at a meeting of the Margaret Elwang Circle of the King's Daughters yesterday afternoon at the home of Mrs. C. E. Spalding on Hitt street. This institution is supported by the King's Daughters of the State. A social hour followed the business meeting.

## BRITISH USE NEW BOMB GUN

**Weapon Invented by Pacifist Called Most Effective in War.**

By United Press  
LONDON, April 6.—A deadly gun that sends up into the air, like a flock of lead pencils, a flight of bombs which sail down on their object with unusual accuracy and terrific explosive effect, has been affording the British army in France a great deal of satisfaction. Officers and men have said it is by far the most effective short-range weapon

thus far devised. It is known as the Stokes gun, taking its name from Wilfred Stokes, inventor.

Stokes is a kindly-looking iron manufacturer who says that until this war he had never wished to invent a gun that would so much as muss a man's eyebrows.

## Dramatic Class to Give Play.

The class in Dramatic Interpretation will present James M. Barrie's "Twelve Pound Look," April 14. This is the

third of a series of 1-act plays which are being given as class work. Robert Winternitz, instructor in the course, has the part of Sir Harry, Miss Mary Robertson will play the part of Kate, Miss Lenore Watts will be Lady Sims, and Henry Tempel will take the role of Toombs, the butler.
